

ModThat

“Mod it your way!”

Ianna Zambrano, Alejandro Corona, Christian Sanchez

Meet The Team

Alejandro Corona

Incoming college freshman
at CCC Wilbur Wright this
fall

Ianna Zambrano

Aspiring Engineer at
Prosser Career Academy &
Chicago Scholar

Christian Sanchez

I want to major in
computer science and go
to Northwestern

Introduction

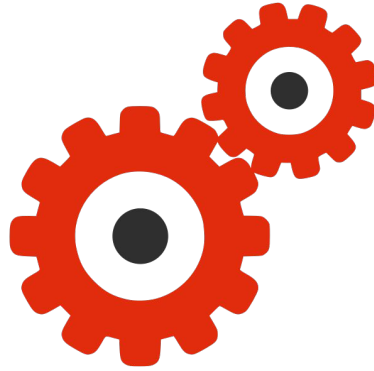

Who is a gamer in this room?

Gamer: What if I could customize
my boring console?

We created this
app to guide
people when they
need assistance
modifying their
gaming consoles.

This app will impact people
who love experimenting and
modifying tech old and new

UI Screenshots

Live Demo Walkthrough

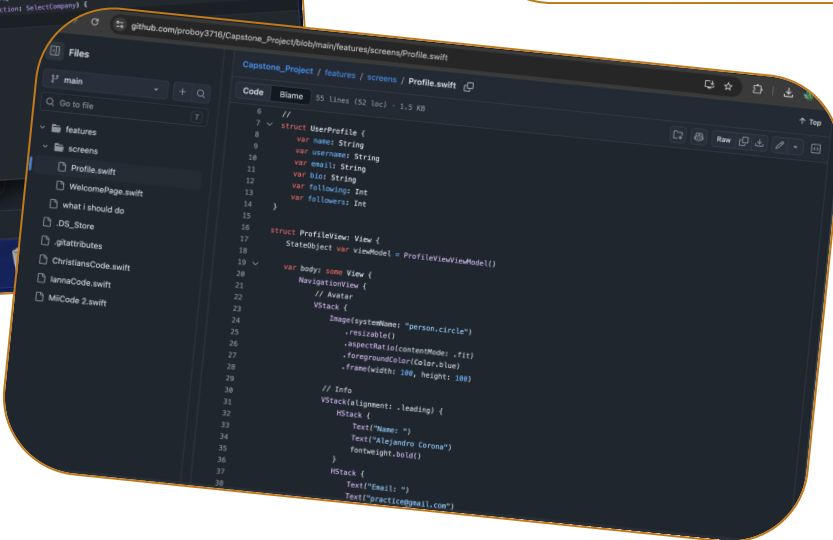

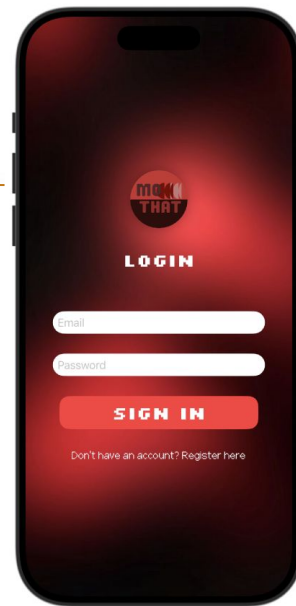

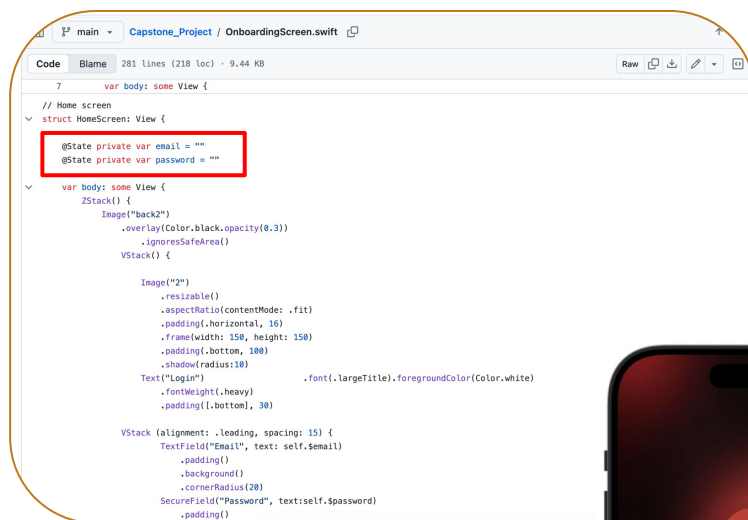

Features

1. Provides links that teaches people how to modify almost any gaming device
2. Shows youtube videos for users to follow along
3. The links take you to where to buy the parts you may need to modify your console

Swift Screenshots

What did you learn? *Before and after program, how will you apply it?*

Before this program I knew nothing about the coding language, Swift. After, I learned how to make apps in Swift and the difference between structures and functions, and many more things. I will use what i've learned to make apps

- **Alejandro Corona**

I learned that coding is not easy! Before this program, I had zero knowledge on Swift and felt indifferent on learning how to code and pursuing a career related to coding. After the first day, I realized that coding can be applied universally. I hope to apply it to creating apps and, eventually, websites, which inspire me to take on other coding languages

- **Ianna Zambrano**

I learned how to pull through even when my code is not working. I also learned what a different programming language looks like this is only my second my first was python, so swift introduced me to so much new things like curly bracts- **Christian Sanchez**

What could you improve?

- 1) Improve the functionality
- 2) Adding the ability to create accounts
- 3) A save button so the user can continue where they left off the next time they return
- 4) Cybersecurity - some users will voice concern over tapping unknown links
- 5) Add older consoles for more coverage
